4" EFB (Blue)- 4" Diameter, 1.5lbs. weight, +19 sq. ft. coverage, 2.5ft. dispersion radius 3 year warranty, no maintenance cost

What's inside?

Mono Ammonium Phosphate- Non-toxic, Eco-friendly dry chemical

How does it work?

The Elide Fire Ball only activates when it comes in contact with a flame. It **DOES NOT** activate on elevated levels of heat. When flame comes in contact with EFB it will activate and extinguish the fire within 3-5 seconds.

2 Main Uses

Passive- EFB is mounted in areas of concern where a possible fire can occur. **Examples:** switchboard and circuit control system, electric appliance areas, electrical outlet, deteriorated or damaged electrical wire areas, battery power bank, lithium-ion battery charger, engine room, kitchen, boiler room, washer/dryer

Active- EFB is thrown, flown, released or launched into an active fire (*Professional use*)

What type of Fires can the EFB extinguish?

Type A- Fires involving solid materials such as wood, paper or textiles

Type B- Fires involving flammable liquids such as petrol, diesel or oils and gases

Type C- Fires involving live electrical apparatus
